

## Elastiko® 100 Engineered Crumb Rubber Dry Process Schematic

ENGINEERED CRUMB RUBBER (ECR)

SHIPPED IN BULK BAGS

TRANSPORTED TO FEEDER

MODIFIED FIBER FEEDER

ECR INJECTED INTO RAP COLLAR

LAIED LIKE REGULAR HMA

Elastiko® 100 is a chemically engineered “Dry Mix” crumb rubber asphalt technology.

### Benefits include:

- Performance equal to Terminal Blend or Polymer
- Competitive to Wet Mix Terminal Blend & Polymer
- Better compaction and density = fewer compaction rollers = less equip & labor
- No special storage required
- Non-sticky for Plant Equip., Trucks & Lay Down = less product wasted
- Controlled Feeder system at plant within 0.2% tolerance
